Makramee Tasche mit geknüpfter Loopy-Wolle

Instructions No. 611

Difficulty: Beginner

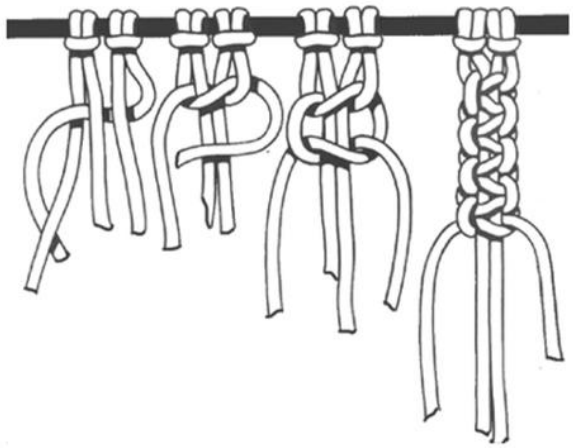
For this cult **shopping net**, a loose one made of Deco fishing net colourful Loopy wool is tied directly to the large round bag handles.

To make sure the bag is also stable, simply sew in between Cotton fabric at the end

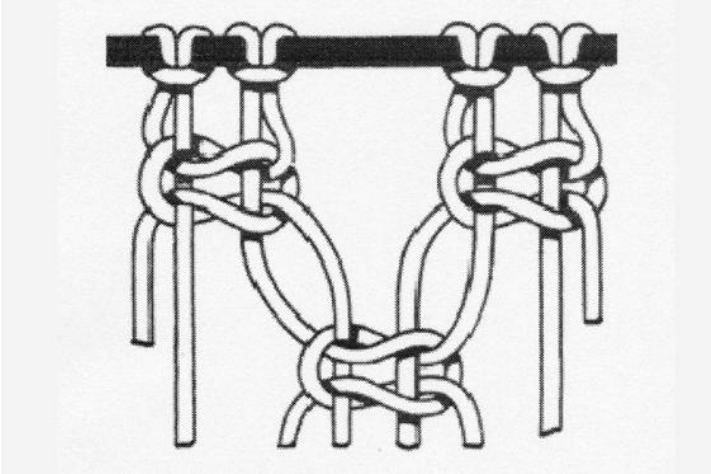
Here's how it works:

Cut the wool into 28 threads of equal length.
Take 14 threads in the middle and tie them with a loop to a Bag handle so that 28 threads of the same length are next to each other.
Knot 4 weaver's knots with 4 threads each, so that 7 strands are knotted next to each other.
Then leave out the two outer threads and tie another 4 weaver knots offset with the middle threads.
With a distance of approx. 8 cm connect the outer threads of each knot (knotting threads) with an overhand knot, let the inner threads (guides) hang.
Hang the two bag handles together for easier working.
Tie the two outer threads of the bag handles together with 4 weaver knots so that both parts are connected with each other, then also connect the threads on the sides with overhand knots.
At last connect two threads lying side by side after approx. 14 cm with overhand knot.
For the ticking cut the Cotton fabric to 60 x 45 cm, fix a 1 cm wide hem on the short side with Pins and sew around.
Fold the blank right sides together, fix the pages with Pins and sew them together up to the hem.
Thread the elastic and sew the hem together, pulling the elastic tight.
Turn the ticking over, insert it into the macramé pocket

and sew it along the handles.
Fix the lowermost knots with a few small stitches to the fabric.



Weaver's knot:
Lay the right knotted cord horizontally over the two guide cords and under the left knotted cord.
Put the left knotting cord under the guide cords and through the loop created on the right side to the front
Tighten the resulting half weaver's knot evenly.
Repeat this half weaver knot continuously, starting with the left and right knotting cord alternately.



Offset weaver knots
