

3D-Dekoration Winterlandschaft

Instructions No. 380

Difficulty: Advanced 🍴🍴🍴🍴

Decorate your house and hall with the Christmassy decorative figures and create a beautiful 3D winter landscape. For Christmas and winter, this beautiful winter landscape is a real eye-catcher.

And this is how it is done:

The base plate of this landscape is an upside down decorative bowl "Alexa". A bevelled glued wood plate was also fixed to it.

In the first step, the glued wood panel is therefore beveled so that there is a narrow edge of 20 cm and a wide edge of 25 cm.

Then transfer the motif of the row of houses onto the glued wood panel. Glue the glued wood panel to the edge of the decorative tray (Glue effect).

As soon as the glue has dried and the board is firmly attached to the decorative tray, you can start painting: Design the winter colour background of the landscape as well as the floor by starting Acrylic paint. to paint the light-coloured house wall in white. The paving stones will be painted grey, the roof tiles red, the night sky dark blue, etc. Work with shades when painting the coloured areas and draw black contours with a fine brush to finish the painting.

After it Acrylic paint dries up, plan the arrangement of your miniature decorations. Paint and fill in decorative snow. Finally, glue all miniatures on and to the painting.

Extra tip

The battery compartments of the LED decorations are connected to the decoration tree or fence by a cable. They can therefore be easily hidden next to or behind the miniature world

This idea is timelessly beautiful!
