

Anleitung bemalte Glaslaterne

Instructions No. 629

🔪🔪🔪 Difficulty: Advanced

With a small insert you can conjure up wonderful decorations on glass!

Here's [how it works](#)

First clean and dry the glass thoroughly. For the paint to adhere properly, it must be free of grease and dust. Then remove the motif butterfly from the template block, cut it out and fix it behind the glass

Next, apply the contour of the butterfly with relief paste (contour paste). Leaves and tendrils are applied freehand

After drying, fill the motifs with Marabou Glass Paint. Work in small steps to avoid colour bleeding. Now fill the lamp base, if desired with colored beads.
