

# Anleitung: quirlige Lichterkette mit Lampenfolie und Stoffen gestalten

Instructions No. 1115

Do you want a light chain of a different kind? Then follow our instructions and create an early summery light that consists of Lamp foil, nostalgic clothes pegs and various fabrics. Creativity and handicraft talent are required here.

And it's that easy:

## How do I proceed to design the individual light chain?

First, take the different fabrics and cut them for 30 lamps. Choose the patterns as you like. Then glue Fabric cuts with the Glue effect on the lamp foils and let everything dry well

## How do I design the little butterflies?

Cut out butterflies from the fabric remnants and glue them onto something Foam sheets, which is also cut into a butterfly shape.

Prime the clothes pegs white and glue the butterfly wings onto the pegs. Decorate the end of the clip with a pink Satin ribbon, by tying a bow and simply glue it on with hot glue. Now put 3 glued lamp foils together and thread the 10-piece light chain. Finally, wrap the decorative garland around the light chain and fasten everything with wire or hot glue to a board or a round wood.
