

African decorative objects turn every room into an exotic place to dream and feel good. With just a few striking accessories in earth tones and combinations of and Blue turquoise, beautiful colonial style decorations are created.

The big Acrylic ball is complete with Straw silk paper before the African continent is Structure Paste applied. The two elephants are cut out of copper plate and plastically stamped.

## It's that simple:

The Straw silk paper tear it into pieces and stick them on the Napkin varnish whole. When the whole is Straw silk paper dry, cut out the hole for the fairy lights with a scalpel. Then simply wipe the surface with copper-coloured metal.

The contours of the African continent are now transferred onto the sphere with a pencil. With a fine Spatula pencil now theStructure Paste apply to the "continents", work out the contours finely. After everything has dried, the modelled "continents" are painted with kind of metal

Insert the light chain into the ball.

In the next step, a sheet of
 copper sheet is roughly shaped into a bowl. The ball is now placed into this shell. The elephants are transferred from the motif template to a copper sheet, cut out and modelled into shape using the metal pressing technique: With the help of the soft special mat and the metal pressing tool, the elephants are worked out plastically, bent slightly at the feet and fixed on the ball with a few drops of hot glue.
