## Black & White casting powder

**Instructions No. 3052** 

Difficulty: Beginner

Working time: 4 Hours

Here you can find out how you can easily water these beautiful Raysin cuttings at home.

Firstly, you should protect your workstation with a handicraft mat.

Mix Raysin and water to form a creamy mixture. Follow the **instructions on the pack!**Raysin white mixing ratio:

280 ml water + 1kg powder = 650 ml casting compound (1x water + 3.5x powder)

## Mixing ratio Raysin Black:

250 ml water + 1kg powder = 520 ml casting compound (1x water + 4x powder)

Carefully pour the mixture into the mould. Tap the filled mould lightly on the surface several times so that

the air bubbles rise. After **approx. 30 minutes**, carefully remove the castings from the mould and sand the edges smooth with **sandpaper**.

## The casting moulds must be cleaned thoroughly after use!

## Article information:

Article name	Qty
Silicone casting mould "Coaster oval"	1
