

Blumentöpfe mit Filz, Draht und Perlen

Instructions No. 536

Difficulty: Advanced 

Working time: 30 Minutes

These colourful flower pots bring colour to the windowsill. They are wrapped with coloured felt ribbons and strings, garnished with coloured aluminium wire, ribbons and beads. You can combine the colours according to your mood and personal taste.

Here's how it works

Prime the top edges of the rose pots with a Paint sponge ivory primer .

Separate the two differently coloured layers of **felt ribbons** and place two colours around each of the rose pots. Fix the ends with hot glue. Next, place the felt cord **around** the pots and fix them with single dots of hot glue.

Thread the **beads** on the pink **aluminium wire** , lay the finished bead wires around the pots and twist the ends firmly. Wrap the turquoise aluminium wire around a pin, take it off and pull it lengthwise. Place the resulting spiral around the pot and twist the ends together.

Make a three-dimensional element of fabric for each pot and glue it on. Finally, tie and glue on small loops from Satin ribbon .

Form small rosettes from Satin ribbon , for this purpose place the Ribbon in loops and fix it in the middle with a small hot-melt adhesive dot, stick a Pearl in the middle.

Fill the pots with sticky material, cover with plate moss and pearl gravel.
Finally, place the orchids and the candle in the pots.

Instructions for sewn elements

Transfer the templates twice each to Fabric cuts and cut them out. Place the blanks left to left and topstitch the inner contours of the butterfly and flower first so that the blanks are fixed and the individual fields are divided. Then sew the outer edges together with a simple loop stitch, gradually filling the resulting fields with

some filling cotton wool before sewing them together completely. Tip: Use a thin wooden stick for stuffing. The middle of the blossom is not stuffed, a button is glued on here. The heart is completely upholstered and glued to a slightly larger felt heart. The butterfly gets feelers made of aluminum wire with a Pearl as a conclusion.
