Boxes in fruit design

Instructions No. 2557

Difficulty: Beginner

Working time: 4 Hours

These are **original gift boxes** in the shape of **delicious fruits**. These are suitable, for example, for small and sweet treats for the next coffee visit as well as for small gifts for a birthday. These great **fruit boxes** are made of paper and decorated with pens and chenille wire.

This is how you design the boxes:

Transfer the **templates** with a pencil onto the desired **papers**.

Now cut out the boxes and fold the inner lines. This is best done with a **folding knife**. To do this, place a ruler against the lines and pre-fold them by running the folding knife along them.

Paint the papers with the classic characteristics of the respective fruits, such as the black dots of the strawberry or

the fruit chambers of the lemon. There are no limits to your imagination.

Then fold the box and glue it together at the glue tabs.

Cut the flap with the hobby scalpel and stick it together.

Print out the **template** for the leaves and transfer it to the paper. Cut out the leaves and attach them to the strawberry or chenille wire with a little craft glue. Glue the **wire** as a stem to the boxes with **craft glue**. You can also use the chenille wire for other decorations such as the fruit rim.
