Card with dreamcatcher

Instructions No. 2020

Difficulty: Beginner

Working time: 1 hour 30 Minutes

Design a beautiful individual **card** with our great **template**. The presentee of the card will be very happy. They Feathers are made of **modelling cream** and give the card a great **3D effect**.

This is how the card is designed:

First pour the **modelling cream** in the desired colours into the **silicone mould and** let it dry thoroughly. We recommend to let it dry Creame over night or about 8 hours, because then the motive can be better removed from the mould

In the meantime, cut from the **Watercolour paper** a square of 10 x 10 cm. A pastel olive-green background with watercolours is designed on top of it. If you are satisfied with your result, let your square dry well. Glue the Aquarelle- square with double-sided Adhesive tape on the card.

Cut an additional rectangle with the dimensions 10 x 2 cm and write on it. Fasten this with **3D Glue pads**.

Download the template and transfer the **dream catcher motif to the** card. Then paint it with a golden Marker off.

After the drying time, remove the square from Feathers the mould and stick it on the Handicraft glue card. Now connect them by Feathers lines with the dream catcher.

Must Have

Modelling clay "Porcellana fantastica", 150 g

Air-drying
Weight: 150 g

6,49 € (1 kg = 43,27 €)
~~RRP 7,80 €~~
