# chain of light with moravian stars

**Instructions No. 2899**

Difficulty: Advanced

Working time: 2 Hours

Make classic moravian stars and then transform them into magical light decorations. Find out how it works here.

To make a Fröbel star, you will need 4 strips of the same length paper strips, that are folded in the middle and cut diagonally at the ends. Use transparent paper strips for the light decoration.

Your pack of paper strips for Fröbel stars contains very good instructions that explain step by step exactly how to thread these 4 strips into each other, pull them into a square and fix them together. Each individual step for folding the star is clearly shown in these instructions.

Before you start with the 3D lace , punch a hole in the middle of the stars using the large attachment of the hole punch. Now fold the 3D lace on one side, punch again with the hole punch and fold the lace on the other side. Punch through here again with a pointed object and pull the chain of light lights through.

Finally, decorate your window with the chain of light , use the shining Fröbel stars as wall decorations during the Christmas season or arrange them with your Advent arrangement.

Have fun crafting!

## Must Have

## Vellum paper strips "Crystal stars"

Grammage: 115 g/m²
Content: 60 pieces
Length: 60 cm
Width: 20 mm
Material: Paper

**9,19 €**
