

Chain of lights with moravian stars

Instructions No. 2899

🔪🔪🔪 Difficulty: Advanced

🕒 Working time: 2 Hours

Make classic moravian stars and then transform them into magical light decorations. Find out how it works here.

To make a Fröbel star, you need 4 strips of paper of the same length, folded in the middle and cut diagonally at the ends. Use transparent paper strips for the light decoration.

Your pack of paper strips for Froebel stars contains very good instructions that explain step by step exactly how these 4 strips are now threaded into each other, pulled into a square and fixed together. Each individual step for folding the star can be easily taken from these instructions.

Before you start with the 3D laces, punch a hole in the centre of the stars using the large attachment of the hole punch. Now fold the 3D laces on one side, punch again with the hole punch and fold the laces on the other side. Punch through again with a lace and pull the chain of lights through.

Finally, decorate your window with the chain of lights, use the shining moravian stars as a wall decoration during the Christmas season or arrange them with your Advent flower arrangement.

Have fun making them!
