Chalkboard with collage

Instructions No. 2851

There are many beautiful ways to capture your holiday memories or exciting adventures. For example, a picture frame with an integrated chalkboard, like this gold-coloured frame, is very versatile. You can decorate the black, smooth chalkboard with photos and write on it with special chalk markers to spice it up. With the particularly fine-writing edding 4085 chalk markers by Securit, you can easily create short texts or detailed drawings in 20 bright colours, including pastel and metallic shades. When finished, the picture frame is a real eye-catcher and a jewel in your home. And if you want to capture a new highlight on the picture frame, this is no problem, simply remove the photos and wipe the design with a damp cloth and off you go to the next project.
