christmas cards From Santa with love

Instructions No. 2858

Difficulty: Beginner

Working time: 1 hour

Isn't it nice to receive a **self-made letter** or **postcard**? Whether on a gift, sent by post or handed over by a loved one - everyone is happy about beautiful words and something homemade. This shows the recipient that he or she is worth a lot to you. With the 3D punching sheets you can easily create letters, postcards and envelopes with great motifs and impressive **3D effects**.

How to create great cards and envelopes:

First, choose a motif from the **3D punched sheet**. Then separate it from the Paper. Pay attention to the sequence of numbers next to the pictures!

First, remove the picture with the number 1. This is the basis. Then remove the second picture and apply some 3D glue pads. to the back. Remove the protective film. Now stick it onto picture number 1, motif over motif. Do the same with the other pictures.

Now take a **card** and an **envelope**, as well as the **natural papers**. Stick a natural paper with handicraft glue onto the card and envelope. Once dry, stick the 3D motif onto the card.

You can also stamp a message with the **stamp set**. Stamp this directly onto the card or onto a separate card and cut the lettering to size. You can also stick this on with **3D glue pads**.
