Clothes pegs Fleet speedsters

Instructions No. 2476

Difficulty: Beginner

Working time: 3 Hours

Our **clothes pegs** can be turned into speedy racers in no time at all. All you need is a little material and you're ready to go. A little paint and glue and in no time at all you have your own fleet of **racing cars** and great **planes**.

This is how the cars and planes are designed:

First paint the **wooden sticks**, **clothes pegs** and **buttons** with craft paint according to your wishes. We chose pastel colours for our aeroplanes and racing cars. Of course, bright or metallic colours are also possible.

Next, you can paint the details such as rally stripes, numbers, doors and more on the wooden parts. If necessary, you should shorten some of the wooden parts.

After drying, you can now glue the wooden parts together to form cars and aeroplanes using **craft glue**. You

proceed as follows.

Cars:

Glue four buttons as wheels to a clothes peg. For our cars, we used smaller buttons at the front than at the back to emphasise the race car character more.

For the spoiler and front wing, glue a small wooden spatula to each.

Planes:

Glue on a wooden spatula as the wing and the airfoil. Next, attach the elevator at the back with some glue. For the propeller, glue on a wooden spatula at the front with a button over it.

Must Have

VBS Wooden Peg Halves, 100 pcs.

Content: 100 pieces
Length: 7 cm
Material: Beech wood
