

Coasters made from creative casting compound

Instructions No. 2972

🔪🔪🔪 Difficulty: Beginner

🕒 Working time: 2 Hours

Design your own coaster in just a few steps. This moulded coaster is ideal for placing other decorations or everyday objects on and adding even more harmony and cheerfulness to the interior.

This is how it works:

First place the silicone stamps in the casting mould. Then mix the creative casting compound with water. We recommend approx. 5 heaped tablespoons of Raysin powder for one bowl. Make sure that the mixture has a creamy consistency and does not clump. If you want to give your creation a special colour, add 2 drops of colour concentrate. In our example, we have chosen the VBS colour concentrate in the colour green. Mix everything well and pour the mixture evenly into the mould.

Tap the mould gently on the table. This will cause air bubbles to rise.

After about 45 minutes, you can carefully remove the casting from the mould. Leave the coaster to air dry for a while before carefully removing the stamps.
