

Colourful planter box

Instructions No. 2831

🔪🔪🔪 Difficulty: Beginner

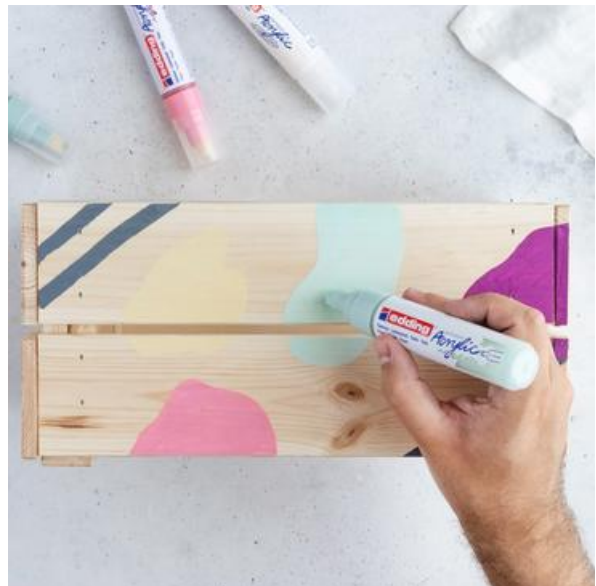

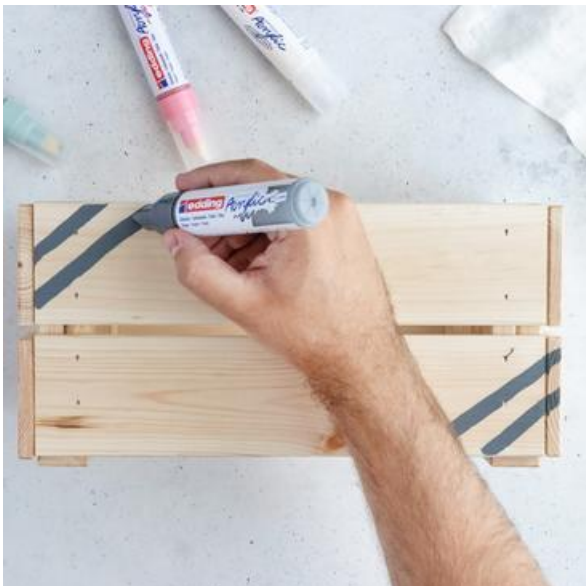

🕒 Working time: 2 Hours

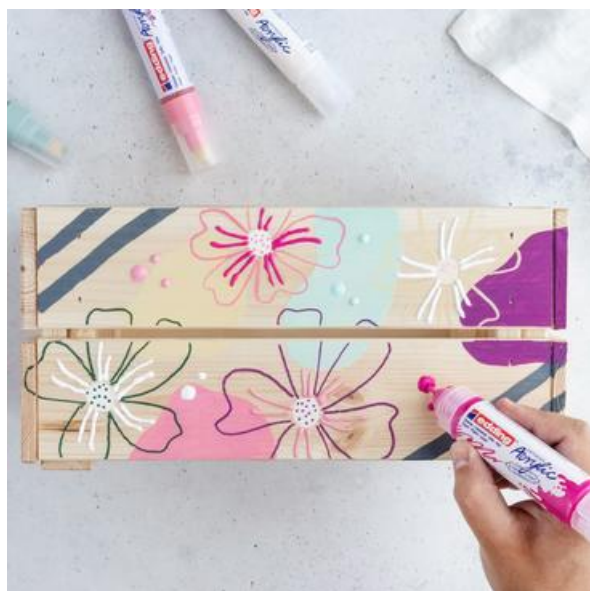

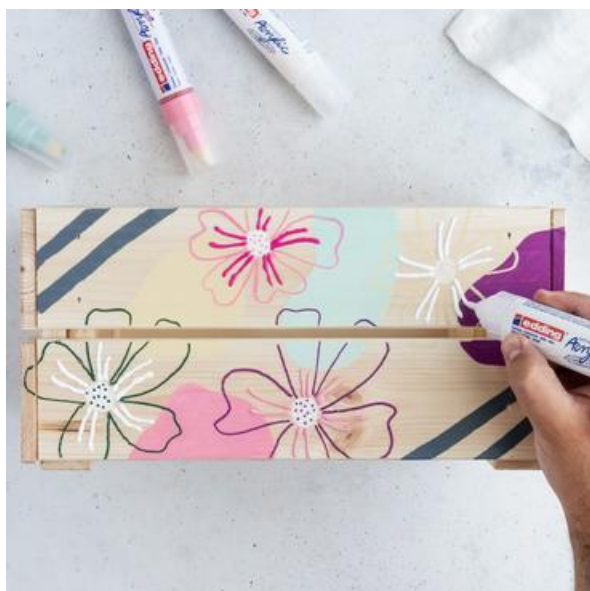

Create a colourful planter box for your favourite flowers with little effort and products. The wooden box was simply designed with various edding acrylic markers, then lined with foil and planted with pretty flowers. A great idea for the summer!

First design the wooden box according to your wishes. You can either paint it freehand or download a template in advance. You can then transfer the template onto the wooden box using graphite paper.

We used the edding acrylic markers for painting. These are available in different widths and in countless great colours. The acrylic markers also impress with their high opacity and brilliant colours. The colours are also waterproof, quick-drying and lightfast. So your artwork will keep its brilliance for a long time.

Once you are happy with the result, let the colours dry completely. Now line the inside of the wooden box with foil. You can fasten this with a stapler. Remove any excess foil with scissors. Fill the wooden box with potting soil and plant your favourite flowers. The summer plant box is ready!
