Concrete shell with organic wax

Instructions No. 2533

Difficulty: Advanced

Working time: 6 Hours

This great **candle concrete bowl** gives off an atmospheric cosy light and is easy to create yourself with a little skill. This beautiful outdoor fire variation can be used in the garden or on the balcony. The mosaic with natural stones gives your **outdoor candle** a beautiful individual look.

This **candle** not only provides a beautiful light, but is also a decorative or **artistic object**.

Even on the garden and balcony table, the atmospheric effect of a small **open fire can** be enjoyed.

How to make the concrete bowl with wax:

Oil the mould. Mix the **concrete** with water according to the package instructions to a creamy mass and pour it into the mould. Then press the **acrylic hemisphere** into the centre of the concrete. Weight down the hemisphere or fix it in place, for example with parcel tape.

After the drying time, remove the acrylic sphere and release the casting from the mould.

Push the **candle wick** into the holder and fix it to the concrete shell with a little hot glue. Melt the **wax** and pour it into the bowl.

When everything has dried, the bowl can be decorated with the **mosaic stones** as desired. The stones should be washed with water beforehand so that the excess dust is removed. It is best to glue the stones with **glue 182**.
