9. Now click on "Produce" (top right) and proceed as follows:

- Select load by mat and click on the corresponding mat size.

- In the following view, the motif can still be rotated or mirrored, but this is not absolutely necessary for this project.

- Click on "next" to go to the material selection. Select "Foam / Craft Foam" here.

- Then follow the instructions in the app and plot out the vase motifs.

In order to be able to stamp with the foam motifs, stick them onto an acrylic block with a little spray adhesive and then dab them with the ink pads.

The stamped motifs can then be used for cards, for example.
