Cute robots

Instructions No. 2238

Difficulty: Beginner

Working time: 1 hour 30 Minutes

Aren't these robots cute? They are made of few materials and are a great decoration for the children's room. This craft idea is easy to make and can also be copied by children.

1. Paint three matchboxes with craft colours.

2. While they are drying, take three more boxes, take them crosswise and paint a black line as a mouth.

3. Make holes in the head with an awl to be able to fix screw eyes and memo holder.

4. Insert a piece of wire for the neck from below.

5. Also poke holes in the coloured boxes where either the neck or the arms should be.

6. Now check: are the wires, eyelets and memo holders tight? If necessary, fix everything in place with a little hot

glue.

7. Glue on wooden staples, wooden balls and hemispheres as arms, hands and feet.

8. Attach the wiggly eyes and a heart to each of them.

Must Have

VBS Matchboxes "Kraft paper", 5 cm

Number of parts: 24
Content: 12 pieces
