Design a toy chest

Instructions No. 2096

Difficulty: Beginner

Working time: 3 Hours

This chest with cute figures offers a lot of space for toys inside. After playing, the little ones can put their toys straight back into the chest, so nothing gets lost and the room stays tidy.

Paint the lid and the front edge of the chest with craft paint in ice blue. Tape the adjacent areas with some crepe tape if necessary. Once the blue paint has dried, paint clouds onto the lid with white craft paint.
Print out the free template and transfer the motifs to the desired places on the chest using graphite paper. Then colour in the motifs with craft paints. Contours and details can be traced with liners.
Paint the letters with craft paint as well. When dry, also add details with the liner and then stick them to the chest with hot glue.
