Design T-shirt

Instructions No. 2791

Difficulty: Beginner

Working time: 2 Hours

Summer is **T-shirt** time! Simply design your own T-shirts - according to your own ideas. In our instructions we show you an example with **free templates** to make a flowery unique piece yourself.

This is how the T-shirt is painted:

First pre-wash the **T-shirt** without fabric softener. It is important that you do not use any additives such as fabric softener so that the colours can penetrate the fabric well.

Place a **craft mat** inside the T-shirt so that nothing stains the back.

Place the **template** on the backing. Trace it with the sublimation pen.

Then paint the areas with the **VBS fabric paint** (the colours can be mixed to create the desired colour variations).

After drying, trace the flowers with the **edding 4600 textile pen**. Allow the T-shirt to dry.

To fix the textiles, iron from the left for approx. 5 minutes. The painted textiles can then be washed at 40°C.

Tip: If the liquid from the sublimation pen is still visible, you can remove it with a little water.
