Easter Metal Ring

Instructions No. 2121

Difficulty: Beginner

Working time: 1 hour

This metal ring has a particularly natural design and is ideal as a decorative element for the Easter season. Hung on the entrance door, the metal ring welcomes your guests.

Using a pair of side cutters, clip the individual stems off the willow catkin branch. Wrap them around the metal ring. As the stems are reinforced with wire, they are very easy to bend into shape. To fix the ends of the willow catkin stems, use perlon threads.
Cut a large piece of white satin ribbon to use as a hanger. Using another piece of white satin ribbon and the patterned ribbon, tie a bow that will be attached to the ring.
Decorate the acrylic egg discs with a marker. As soon as the paint has dried, hang the discs on the ring with perlon threads and then stick feathers on them. Finally, also decorate the metal ring with some feathers.

Must Have

Metal ring "Circle", White, Ø 30 cm

Diameter (outside): 30 cm
Material: Metal
