Easter nest with Easter bunny

Instructions No. 2489

Difficulty: Beginner

Working time: 5 Hours

This gorgeous Easter nest with bunny and flowers is the perfect eye-catcher for spring and the Easter season. Learn in this tutorial how to cast the little bunny from Keraflott and then arrange it together with some decorative elements.

1. First pour the Keraflott bunny: to do this, mix the powder with water in a container to form a creamy mass. Read the instructions on the package. Pour the mixture into the mould and leave to dry for several hours.

Tip: Use the practical mould holder as a helper. This is placed in a container with water and then the mould is attached. This way, the casting compound can be poured in optimally and you get a perfect result.

2. After approx. 12 hours, remove the casting from the mould and leave it to dry completely in the air for a further 12 hours.

3. Use VBS Beton Color to give the bunny a rustic look. Use a brush to apply the colour.

4. Once the colour has dried, you can arrange the bunny in the brushwood nest together with artificial flowers and feathers. Use a little hot glue to fix it in place if necessary.

Must Have

Keraflott Relief Casting Powder, White, 1 kg

Weight: 1 kg

7,79 € (1 kg = 7,79 €)
~~RRP 9,50 €~~
