Felted Christmas Birds

Instructions No. 2367

Difficulty: Advanced

Working time: 6 Hours 40 Minutes

These cute **birds** with a **Christmas look** are the ideal project to try out **felting**. But even for advanced crafters, the birds are a great decoration for the Christmas season. With just a few materials and a little skill, you have finished making the funny flock of birds and can decorate them on the windowsill, table or chest of drawers.

This is how the cute birds are felted:

These **birds** are made from re-felted **polystyrene balls**. This gives the birds their shape. By using the polystyrene balls, you also need much less **felting wool**.

The birds are made using the **dry felting technique**. To do this, first take a polystyrene ball. We chose the sizes Ø 5 cm and Ø 7 cm to create different sized birds. Place the desired fairy tale wool on the polystyrene ball and pierce it with the felting needle until the materials have joined. Felt the birds with the details of the trousers etc. in this way.

First felt the beak, the wings and the eyes on the **felt mat** until the desired shape is achieved. Then felt the parts onto the birds with a little fairy wool.

Stick the **feet** into the birds and fix them with some craft glue.

Glue the **hat** and the **buttons** onto the head with craft glue.

Must Have

VBS "Dry felting" starter set

Number of parts: 17
