# Firs from polystyrene cones

**Instructions No. 1682**

Difficulty: Beginner

Working time: 20 Minutes

What could be better than an impressive home decoration that is homemade and at the same time takes little time? These pretty fir trees are conjured up in a few minutes and only needs little material. The great thing is: the little trees can also be made together with children.

## And it's that easy:

First of all, take a **Polystyrene cone** in the desired size at hand. Make a glue dot with **hot glue** at the bottom of Polystyrene cone and start to wrap the wool cord **around** the cone. You should fix the string with hot glue in places to prevent it from slipping away later. In this way you can design the styrofoam pans **in** different sizes. Finally, a star is formed from **silver wire**, which should decorate the top of the Fir

Tip: To get evenly shaped stars, you can take a Cut out form to help you and bend the wire around the form.

## Must Have

## Polystyrene cone 20 cm

Height: 20 cm
Material: Polystyrene

**1,49 €**
~~RRP 1,99 €~~
