Glasgestaltung mit Farbspray und farbigem Flachdraht

Instructions No. 588

With spray paint and coloured flat wire, glass vases and bottles become fashionable decorative objects. The practical Pearl Pen provides the plastic structures beforehand.

And this is how it works :

With the Pearl Dab Pen samples onto the vessels. Allow the beads to dry before turning the vessel so that they do not smudge.

Cover the work surface generously with Paper and work on the open window if possible. Spray the different colours in several thin layers from a distance of about 25 cm.
Important: Shake the can well for at least 3 minutes before the first spraying and make a test first.
Let the paint dry for at least 30 minutes, then seal the surfaces with spray paint.

Roll up the flat wire to snails, fix the ends with tape-Ribbon and stick the finished snails onto the vessels with All purpose glue . Alternatively wrap the flat wire directly around the vessels and fix the ends with tape-Ribbon .

Material science: Edding Permanent Spray

This liquid Acrylic paint for spraying is perfect for priming and designing objects made of wood, metal, Paper, cardboard, Stone, glass and much more. It is important that the surface is clean, dry and free of grease and that the can is shaken for at least 3 minutes before use. This ensures that the paint is applied absolutely evenly. The spray is available in 34 different colours.
