Instructions for colourful lanterns

Instructions No. 1223

Difficulty: Beginner

In this manual we explain how you can easily create colorful Lanterns . The motif template helps you to realize your craft idea.

And it's as easy as that:

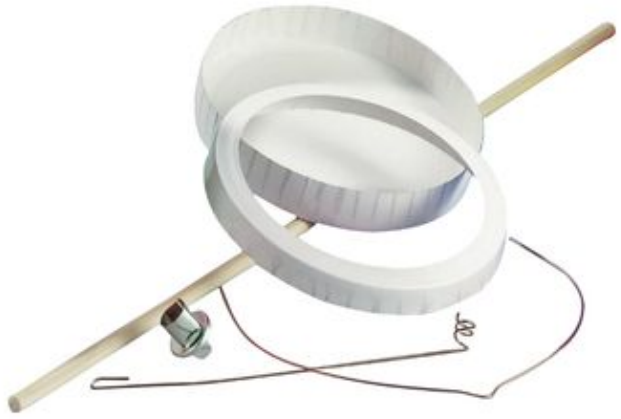

Which craft material do I need for the colourful children's lanterns?
To make the colourful children's lanterns you need the VBS Lanterns-set with all the necessary basic materials, Vellum paper in rainbow colours and white, gemstones and Craft cardboard sheet. In addition, a pair of craft scissors, Handicraft glue, a Craft Punch "flowers" and a Edding are required.

How do I make the colourful children's lanterns?

For the flower lantern, the lantern bases are stuck to the white lantern foil with tape. Afterwards, blossoms are punched out of the rainbow paper, pasted with gemstones and attached to the white lantern foil. At the end you attach Kandelaar and lantern bracket - ready is the flower lantern!

The monster lantern is made in a similar way to the flower lantern. You attach the rainbow-coloured lantern foil with tape to both lantern bases. From the same Paper you cut out arms, legs, hands, feet, eyes, horns and buttons. The head and ears are made from Craft cardboard sheet. The legs and arms are each folded into an accordion to create a particularly funny look. Then you glue all body parts together and on and attach Kandelaar and lantern brackets.

Must Have

VBS-Lantern set

Number of parts: 5
Material: Wood, Metal, Paper
