kandelaar made of concrete

Instructions No. 1767

Difficulty: Beginner

Working time: 1 hour

At Easter the decoration may be a little more original. How about these cute **concrete** candlesticks, for example**?** They look great on the window band, on the table or even on the chest of drawers - not at Easter only time!

This is how the Kandelaar concrete is made:

Stir the **concrete with** water according to the package insert. Glue the **candle sleeves upside down** (with the opening facing downwards) into the moulds **with** some **hot glue**. Now fill the mixed concrete mass **into the** desired casting mould. Let the whole thing dry well

Remove the moulds after **about 24 hours**. Paint with a **Marker** cute faces on the resulting Kandelaar. stick candles put into the candle sockets suitable candles **with** a diameter of about 22 mm

Then wrap some wire **around** the candles and form rabbit ears. Optionally you can also fill one with Test tube moss and **artificial plants and** flowers and place it in the candle spout. Tip: As this is a Test tube bit too small for the candle sockets, you should put some hot glue in the socket and then press the glass into it.

Must Have

Concrete for creatives, 1,5 kg

Weight: 1.5 kg

9,99 € (1 kg = 6,66 €)
