

Lightbox mit Sternenfolie

Instructions No. 1592

Difficulty: Advanced 🖌️🖌️🖌️🖌️

Working time: 3 Hours

Light Boxes must not be missing in any apartment!

They are currently a particularly hip light decoration and easy to make. They can be decorated with characters, pictures or simply with colours. With our star light foil Magic Star you give small Light Boxes a **big effect**.

Procedure for making a lightbox:

Step one:

Prime the cardboard frames with [white Acrylic paint](#) and then decorate the frames with different shades of green and Inca [Gold](#). In addition, to make the frames even more interesting, we have applied decorations with a [white edding pen](#) after drying

Step 2:

Next, place the cardboard frames on your star foil [and](#) paint both the outer and inner edges of the frame. Cut out your hexagon at the outer edge and cut in at the corners up to the inner edge (mark).

Step three:

Now you can design Lamp foil with templates, color and much more. In our example we have combined the Stencil "hummingbird" with the Stencil "Hibiscus". It is best to spray the stencils with [temporary spray glue so that](#) the motif does not slip while painting and then place them in the desired position. With Stenciling ink in different colours you can now create the motif beautifully coloured.

Step four

Prepare the Lamp foil for gluing in. For this, bend the edge backwards. Next, slide the stars-Lamp foil into the

hexagon and attach them with double-sided Adhesive tape. Step 5 For a great lighting effect, attach a light source like a string of lights behind the frame. You will be impressed by the light effect. Your Lightbox is now ready and ready to move into your home!
