Tying instructions for a Terracotta-pot with hanging basket

Tie all 12 threads of the pot together, place the knot in the pot and thread all threads through the hole in the bottom of the pot.

Turn the pot upside down and divide the threads into 3 strands of 4 threads each

Put three coloured rings on the upside down pot, thread the threads of the strands alternately over and under the rings. You get a great look, at the same time the rings are fixed by the threads on the pot. Nevertheless, the rings should be additionally secured to the Terracotta-pot with Handicraft glue .

As soon as the glue has dried, 4 strands are connected to Macramé-strands (weaver knots). After about 3.5 cm, pull a Pearl onto the middle threads and then either tie further or secure the Pearl with a normal knot.

Design each hanging basket individually!

Make the strands of each hanging basket according to the same pattern, making sure that the knots and beads are placed at the same height if possible

However, vary the knotting pattern on the next pots you create: change the length of the knotted strands, the number and placement of wooden beads.

The arrangement of several pots is especially interesting if one pot is additionally decorated with painted wooden rings

As soon as the strands are long enough to serve as an optimal suspension, simply knot all strands together.

Fill the Terracotta-pots with potting soil or Flower arrangement foam. Place succulents or other decorative green plants in the pots and arrange all the pots to form a harmonious decoration:

Hang the pots evenly spaced apart in different lengths

How do you succeed in arranging hanging decorations as harmoniously as possible?

Several hanging baskets of flowers can be hung on a wooden pole, for example. This in turn can be attached to a hook on the ceiling or e.g. in a tree by means of a suspension strap.
