

# Magische Winterdeko

Instructions No. 908

This Christmas tree is truly magical. As soon as it shines in its light, the stars become visible. Its height makes it particularly suitable for decorating in ensembles and gives your Advent decoration a glamorous touch.

And it is as simple as this:

Prime the tree with the painting sponges in the colour brown and let it dry. Transfer the outline of the tree to the film and cut it out. Use hot glue to stick the fairy lights into the outlines of Fir. Use the tape-Ribbon to attach the foil to the tree.

Primer the aluminium sheet in white and apply the upper, printed layer of Napkin to the sheet with Napkin varnish .

After the lacquer has dried, cut out the motifs and emboss the motif contours first with the napkin layer facing upwards. Then turn the metal and emboss the surfaces. For this purpose we recommend the special embossing mat to achieve an optimal result

Finally, glue the embossed motifs decoratively onto the tree with hot glue.
