Making a Wrap Bee with Wool

Instructions No. 2381

Difficulty: Beginner

Working time: 1 hour

Our **bees** are a **great craft project** to do with your child. Also a nice activity at **children's birthday parties** and with **children's groups**. The bees can be "flown" through the air by the child on a stick or decorated beautifully with a hanging ribbon. **On the strings - wrap - go!**

This is how the bee is wrapped:

First transfer the **template** onto the corrugated **cardboard**. Then cut the body of the bee with a cutter. This should be done by an adult for safety reasons as cutters are very sharp.

Then the child can start winding the **strips**. Fix the beginning and end of the thread with a little craft glue.

Transfer the **wings** to transparent paper and cut them out. Now fold the glued edge. Push the wound wool a little to the side so that the wings can be glued to the corrugated cardboard.

Glue on the **eyes**.

Shape the antennae out of **chenille wire** and glue them into the cavities of the corrugated cardboard.

Either glue a **stick** into the hollow of the corrugated cardboard at the bottom of the bee or pull in a piece of wool at the top to hang the bee from.

Must Have

Corrugated board blank, 2-flute

Length: 60 cm
Width: 38 cm
Thickness: 6.5 mm
Material: Cardboard

2,59 € (1 m2 = 11,36 €)
