

Maritime Knot School on Stretcher

Instructions No. 352

This **classic should** not be missing **in your maritime decoration** . The instructions are a great idea: figure wire is perfect for the sailor's knots, because the knots immediately stay in shape.

It is as simple as that:

The Stretched Canvas beach is coated with wood glue and the fabric is laid on without wrinkles. It is important that the striped pattern runs parallel to the edges of the stretcher. The excess fabric is then stapled to the back of the stretcher.

For the knots, figure wire is cut into sufficiently large pieces and then placed in sailor knots. The protruding figure wire is cut off in each case. Now the knots are glued Driftwood to one piece each.

Cut out from black with the Craft cardboard sheet help of an Stencil oval circle. With a white liner pencil the edge can be emphasized by writing the names of the individual sailor knots on the label plates.

Stick pieces of driftwood and label plates on the with hot Stretched Canvas glue, Sand work it in special-effect blue and apply it to the Stretched Canvas from beach.

Extra tip: On the Internet you will find a large number of sailor's knots.
