Mermaid lantern

Instructions No. 2000

Difficulty: Beginner

Working time: 3 Hours

I walk with my **mermaid lantern**.. children's hearts beat faster when they see this wonderful lantern with mermaid scales. With the lantern base and lid and a little bit of windmill foil, this lantern is easy to make and can be easily moved with children. The result can be seen in any case!

So the lantern is made with the mermaid scales:

Cut a 22 cm high strip from the **wind turbine film** on the 50 cm wide side

Now punch circles with the **motif holes** from the **Vellum paper** off. Glue these Handicraft glue onto the wind turbine film. This gives a beautiful scale pattern of the mermaid

Paint the **lantern lid** and base with Viva Decor Maja Stardust. After drying, glue the wind turbine film to the inside of the lantern lid and base using Handicraft glue or hot glue

Put the **lantern bracket** through the lid and bend the ends upwards for fixing. Now you can choose if you want to use an electric stick, a simple stick, a candle holder or a light chain.

Must Have

Lantern bases/lids "Large", 10 pairs

Content: 10 pieces
Diameter (outside): 15.3 cm
Material: Cardboard

5,99 €
