

Miniature Winter Landscape

Instructions No. 2932
🔪🔪🔪 Difficulty: Beginner
🕒 Working time: 2 Hours

Are you ready to experience the magical beauty of winter in miniature? In this craft tutorial, we'll create an enchanting miniature winter wonderland that will transport you to the frosty world of winter. With a few simple materials and a little creativity, you'll be creating a fascinating winter scene in no time.

First cut the corrugated cardboard blank to the desired size. We chose a circle with a diameter of 25 cm. This serves as the basis for the miniature winter landscape.

Coat the cardboard with decorative snow. As long as the snow is still a little damp, you can place the miniatures in it. This will fix the figures in place.

Finally, brush the transitions between the figures and the snow with more decorative snow. Let everything dry.
