Noble bowls from cast design

Instructions No. 1740

The noble round bowls are manufactured with fine white casting compound. The surface has a fine-pored pretty ceramic look. With Napkin technique or with noble Metallic paint an individual special design is created.

Casting design round shells

The **planting bowl Florina** with Ø 28 cm can be perfectly used with a 20 Acrylic ball cm bowl for watering a large bowl. A slightly smaller round bowl is made from an Acrylic ball 18 cm and a Acrylic ball 16 cm bowl.

In the 18 cm high **Acrylic ball** 20 tablespoons of Raysin **casting compound** are **filled** and water is added until a creamy mixture is formed. To obtain a bowl in the pastel shade as in this idea, 10 drops of the colour concentrate are added to the creamy casting mass. Everything is mixed together. Then simply press the smaller one Acrylic ball with 16 cm Ø into it and weigh it down a bit to create the hollow in the bowl.

For the large bowl, which is created with the planting bowl, 30 tablespoons of casting compound are needed.
Tip: the more you Colour Concentrate use, the stronger the colour of the dried watering design object will be.

After the mass has dried through, the mould can be removed from the bowl or ball. The edges are rounded off with Sandpaper .

Finishing with colour and Napkin

As described above, the white casting shells are given a pastel shade by using the colour concentrate.

The inner surfaces of the casting bowls can be refined with gold paste.

For the design with Napkin technique , for example, the edges are primed with pastel paint. The desired napkin motifs are cut out and the lower unprinted layers of paper are removed. The bowl is also Napkin varnish painted, the napkin motifs are positioned and fixed with the napkin brush and varnish.

Must Have

Casting powder "Raysin 100", white, 1 kg

Weight: 1 kg

6,19 € (1 kg = 6,19 €)
~~RRP 7,49 €~~
