

Noble fir wreath with miniature landscape

Instructions No. 1680
🔪🔪🔪🔪 Difficulty: Beginner
🕒 Working time: 45 Minutes

At Christmas time, pine wreaths are **simply** a part of it. Why not make an extraordinary wreath for once? In the following we will show you how to make a great Christmas wreath for your front door with a small miniature landscape **in** the middle.

Here's how it works:

Make a square frame from **birch branches** . **Glue** it inside the wreath with **hot glue** to create a frame for the miniature landscape.

Then place the miniature wall at the **bottom of** the frame and glue it in place. Now you can add more fir trees arrange and stick it. Or you can use other miniatures. How about deer and a snowman, for example?

For decoration we have decorated the wreath with **scattered parts**

Another christmassy **Ribbon** to the wreath and you can hang it up and your guests can marvel at it

Tip: It also looks great if you can conjure up additional lighting effects in the wreath. To do this, place **a chain of lights** in the wreath and glue them in place. You can hide the battery box at the back. Your wreath will shine in a beautiful light.
