

Pouring Lavender Soaps

Instructions No. 2866

🔪🔪🔪 Difficulty: Beginner

🕒 Working time: 2 Hours

Pour gorgeous smelling lavender soaps. These look beautiful and also give off the pleasant lavender scent. Beautifully packaged, the soaps are also a great gift idea.

You need approx. 60 g of organic cast soap per bar of soap.

Heat it in a melting pot or alternatively in a melting ladle over a water bath. Add soap colour, fragrance oil, skin care argan oil, cosmetic emulsifier and lavender flowers to the melted soap.

Pour the mixture into the mould and allow it to set. After about 4-5 hours, you can carefully remove the soap from the mould.

Coat the wooden soap dish with wood stain. After drying, smooth out the wood fibres with sandpaper. Then coat the tray with aqua varnish to protect the wood from moisture. This protects the wood from moisture.

Cut two 4 cm wide strips from the natural paper and place them around the soap bars. Place one or more lavender flowers on the band and tie it to the soap with warp yarn.
