School Cone Ballerina

Instructions No. 1940

Difficulty: Advanced

Working time: 3 Hours

The child's **school enrolment** is a big day. You will always remember this day and take lots of pictures. So what could be better than **crowning** this special day with a **homemade school bag**? In our instructions we explain how to **make** a school bag in the shape of a ballerina - a childhood dream comes true!

This is how you make the dancer:

Glue the **school bag blank with** and Adhesive tape Handicraft glue together.

Design the head and upper body of the ballerina**.** For this you paint a 20 cm **ball in** beige **Handicraft paint**. The other 20 cm ball representing the upper part of the body is painted with rosé. A 10 cm Handicraft paint. ball is painted in the colour of the chignon and the hair is painted in the same colour on the ball representing the head. We have chosen reddish brown Handicraft paint . Of course you can also use other colours if you want the dress, the hair or the face colour to have a different colour. Contours and the face are painted with a Marker recorded

For the **Chain** we have the **Wooden balls** painted Handicraft paint with white and glittering paint and mounted on winding wire. Now glue the torso, head and bun together with hot glue and attach them.

Glue the blank school bag with the felt**.** Leave the lower ones about 22 cm free. Glue the **glitterRibbon** onto these. Cut out Felt two parts for the feet and stick them with hot glue **on the side of** the glitter tape. This is how the open ballerinashoes should be represented. For the lacings on the legs, attach satin ribbons and fix them with hot glue if necessary.

For the tutu **:** "sew" **the** edge through from the tulle **with** loose Embroidery twist stitches at a distance of about 1 to 2 cm and push the tulle together or curl it on the thread again and again until the length corresponds to the circumference of the opening of the school bag. Depending on how much tulle is used or how tightly the tulle is pushed together on the thread, a more or less bulky tulle is created.

Knot the ends of the **embroidery twist** and fix the bag with hot glue on the inside of the school bag opening.

Attach the body of the ballerina with **Velcro points in** the opening so that it can be easily filled and reopened later.

Must Have

School gift bag from photo cardboard, Sun yellow

Grammage: 300 g/m²
Diameter (outside): 20 cm
Height: 68 cm
Material: Paper
