

Seife mit dem Konturenliner gießen

Instructions No. 1662

Difficulty: Beginner 🍷🍷🍷🍷

Working time: 30 Minutes

Soaps can be produced very quickly and can be personalised in your favourite colour and with individual lettering and contours on the soap. Perfect as a gift for your loved ones or for yourself.

It's that simple:

First choose a motif or draw your personal relief design. Now place the motif under the [Casting mould](#). For easier handling, cut out the template and attach it to the bottom of the mould with a little Adhesive tape . Important: If you want to transfer lettering, you must print the template mirror-inverted. Draw the lines with the contour liner and let the compound cure for about 3 hours. Then fill the mould as usual with the liquid wax

Now melt the [white eco-casting soap](#) and add the Soap colour . In our decoration example we have chosen Stone Grey and Lavender . Now pour the melted soap into the moulds. Allow the liquid soap to dry thoroughly and carefully remove the finished soap bars from the moulds. The elastic lines of the [Contour liners](#) can be pulled out of the soap with a pointed object

Let the [transparent soap](#) melt, mix in the orange colour and pour it into the desired form. After the drying time, you can remove the finished soap. Tip: You can also place a fir branch in the liquid mass instead of the paint and let it dry.

Must Have

[VBS Eco pouring soap, White, 300 g](#)

● **8,60 €** (1 kg = 28,67 €)
~~RRP 9,95 €~~
