

# Snow-covered light arch

Instructions No. 2028

🔪🔪🔪 Difficulty: Advanced

🕒 Working time: 3 Hours

When the days get darker, it is especially nice to arrange **decorations with light in** your own four walls. Our **arc** is particularly beautiful and looks like a small miniature snowy landscape. An eye-catcher also on your dresser or windowsill!

## That's how you Light arch make it:

First you prime the **Light arch** with white so that Handicraft paint, later on the back wall through **Napkin** doesn't shine through. After drying, the back wall is also coated Napkin varnish, the top printed layer of the paper placed Napkin on top of it and again coated with **Napkin varnish** painted. After drying, the back wall can be additionally decorated with diffusers and with a beautiful lettering. Best suited for this are Marker.

After drying, the **decorative snow** is distributed with a spatula. **Tip:** If necessary, one can be cut in Polystyrene ball half to indicate a mountain. Then spread the mountain with decorative snow

Now the **Wood building kit** "little house" and put it together with **Handicraft glue** fixed, afterwards painted-Handicraft paint with your wish. Do not fix the roofs yet, so that it is easier to pull the lights through the houses later.

Pull the **LED light chain** first from the back through the window and Light arch, then from the back through one window and out again through another one. It is best to leave some lights in the house and further move to the next house. Repeat this until all 4 houses are equipped with the light chain. Place the houses in the decorative snow and if necessary spread some snow on the houses. Cover the fairy lights wire between the houses with decorative snow. Spread some decorative snow on the roofs of the houses. White glitter can be **sprinkled** on the wet snow. Finally, fix the roofs to the houses with hot glue.

When everything is dry, a light chain **with** switch is inserted through the holes in the back wall of the light arch from behind and fixed with a hot glue dot. Glue Light arch the battery compartment of the LED light chain also with hot glue on the back.
