Softtone door sign

Instructions No. 2528

Difficulty: Advanced

Working time: 5 Hours

Give your entrance area a very personal touch with a self-designed **door sign**. You can also attach all the names of the **family members** to it at the same time. In this tutorial we will show you how to make a personalised door sign out of **clay**.

This is how you make the door sign:

First, protect your workspace with a wipeable blanket or pad.

Knead the **soft clay** softly and then roll it out. Cut out a **house shape** and two long rectangles to place on the house as a roof. Cut out designs from the clay with **cookie cutters** or create your own shapes.

Poke holes in the motifs and in the house so that they can be hung on the house when dry. Allow everything to dry thoroughly (approx. 24 hours).

Paint the house with white **Outdoor Color**. If necessary, print out the template and transfer it to the house with graphite paper.

Trace with the **Posca Marker** and add names to the small motifs. Attach the picture eyes to the back of the house.

Scatter pieces and **decorative elements** can be glued on well with Max Repair. Attach the small motifs to the house with ribbon.

Attach the **ribbon** for hanging.
