Spring metal ring with casting

Instructions No. 2986

Difficulty: Advanced

Working time: 3 Hours

A spring-like metal ring with an enchanting casting is waiting for you to create it! Immerse yourself in the world of handicrafts, create delicate works of art from Raysin, design with watercolors and wire and embellish your work with fluffy pompoms and flowers.

Produce the casting:

In a beaker, mix 4 tablespoons of Raysin with water to form a creamy mixture. This is best done in our mixing cup, to achieve the perfect consistency. It is also easy to clean later.
Carefully pour a small amount of the resulting mixture into the pendant of the cute "Happy Spring" silicone mold. Fill the mold with the "bunny" about 1 cm high. Gently tap both molds on the surface to bring any air bubbles to the surface.

After a short waiting time of approx. 30 minutes, the molded works of art can be carefully removed from the molds. Carefully smoothing the edges with sandpaper gives the castings a flawless surface.

Set color accents:

Using a fine brush and watercolors, the lettering on the pendant is artfully colored and brought to life. The delicate blossoms of the gypsophila are carefully plucked and tied around the metal ring with filigree enameled copper wire.

Almost finished:

Now drill a hole in the bunny. Then cut a piece of cord , pull it through the bunny and the pendant and knot it. Wooden beads can now be threaded on to suit your taste. The ribbons are cleverly knotted to the metal ring.

Creative refinement:

Use the VBS handicraft glue stick the fluffy pompoms and some of the delicate flowers onto the bunny. This creates a harmonious overall look. Finally, the cotton-look ribbons are artfully attached to the metal ring to add the finishing touch.
