

# Spring metal ring with moulding

Instructions No. 2986

🔪🔪🔪 Difficulty: Advanced

🕒 Working time: 3 Hours

A spring-like metal ring with an enchanting mould is waiting to be created by you! Immerse yourself in the world of handicrafts, create delicate works of art from Raysin, design with watercolours and wire and embellish your work with fluffy pompoms and flowers.

## Produce the moulding:

In a beaker, mix 4 tablespoons of Raysin with water to form a creamy mixture. This is best done in our mixing cup to achieve the perfect consistency. It is also easy to clean later.

Carefully pour a small amount of the resulting mixture into the pendant of the cute "Happy Spring" silicone mould. The mould with the "bunny" is filled to a height of approx. 1 cm. Gently tap both moulds on the surface to bring any air bubbles to the surface.

After a short waiting time of approx. 30 minutes, the moulded works of art can be carefully removed from the moulds. Careful smoothing of the edges with sandpaper gives the moulded pieces a flawless surface.

## Set colour accents:

Using a fine brush and watercolours, the lettering on the pendant is artfully coloured in and brought to life. The delicate blossoms of the gypsophila are carefully plucked and tied around the metal ring with filigree enamelled copper wire.

## Almost ready:

Now drill a hole in the bunny. Then cut a piece of cord, pull it through the bunny and the pendant and knot it. Wooden beads can now be threaded on to suit your taste. The ribbons are skilfully knotted to the metal ring.

## Creative refinement:

Glue the fluffy pompoms and some of the delicate flowers to the bunny using VBS craft glue. This creates a harmonious overall look. Finally, artfully attach the cotton-look ribbons to the metal ring to add the finishing touch.
