# Star light cone from modelling clay

**Instructions No. 1665**

Difficulty: Beginner

Working time: 30 Minutes

You don't have to have learned the pottery craft for these star light cones. With Modelling clay, which dries up to a porcelain-like surface and only few aids the great light objects succeed in short time.

## You can model light cones as easy as this

The **Modelling clay** will be set at **Polystyrene cone** formed. In order to be able to separate the basic body later on from without any problems, first download the motif template and transfer it onto baking paper. Cut the baking paper to size and wrap one Polystyrene cone in 12 cm and one in 20 cm

Pre-knead the Modelling clay into a smooth mass according to the product instructions and then use the acrylic roller to form a flat modelling dough. Place the motif templates on this dough sheet and cut out the corresponding shapes. Remove the stars with cookie **cutters**. Wrap the modeled sheets around the polystyrene molds, moisten the ends with a little water and join the edges together until there is no seam left

After the shaped star cones have dried, the inner bodies can be removed from Polystyrene . **Paint** the inside of the cones with lemon-yellow paint, this will give the light a special warmth later

Once the paint has dried, place each cone on a glass-Coaster and fit an LED tea light.

Must Have

## Modelling clay "Porcellana fantastica", 500 g

Air-drying
Weight: 500 g

**14,99 €** (1 kg = 29,98 €)
~~RRP 17,80 €~~
