Summer lanterns

Instructions No. 2535

Difficulty: Beginner

Working time: 3 Hours

These **naturally decorated lanterns** conjure up a beautiful light on your terrace or balcony. With few materials, you can put together this decorative light source yourself.

This is how it works:

Glue the **tree slices** together with **wood glue**. To stabilise the different heights, fix several bark slices on top of each other and fix them between the tree slices.

Stick the **tape** around the glass lanterns with double-sided adhesive tape.

Now place the **lantern glasses** on the tree discs and decorate as desired. In our example, some stems were cut from the eucalyptus with the side cutters and placed around the lanterns. If necessary, fix them with hot glue.

Paint the **wooden figure** with the craft paint and add accents with the Posca marker. Tie the jute ribbon around the

trunk.

Place maxi tea lights in the glasses.
