

Trendy Osterei-Objekte aus Beton

Instructions No. 1563

Difficulty: Beginner 🍴🍴🍴🍴

Working time: 45 Minutes

You can put this **concrete-Easter eggs** They are a great eye-catcher inside and out and can be produced by yourself with little effort.

The casting mould "egg" is nice and flat and later results in a flat egg object that can be placed safely. The motifs are printed as picture relief in the concrete surface.

Preparing the mould

First print out the **motif template** and transfer the motif and the font into the casting mould

Important: Both templates must be mirror-inverted to the later result on the casting object (you will therefore receive the rabbit and the writing in the motif download as a mirror to the final result).

Place the template under the transparent egg shape and draw all contours with the [Concrete Art Liner](#) after.

Casting

While the contour is drying [Cast Concrete](#) mixed according to the product instructions. Spray the casting mould with release agent so that you can easily remove the finished casting object from the mould later. As soon as the lines of the Concrete Art Liner have dried, the casting compound can be added to the mould.

Allow the concrete mass to dry and harden at rest (approx. 24 hours). Then the finished concrete egg can be removed from the mould. The lines of the concrete art liner are rubber-like and can therefore be easily removed.

Creative with colour

Now paint the bunny and the Easter egg areas according to your personal taste with [Chalky colour](#) small dots, pastel-coloured areas or contours give the egg objects that certain something.
