Underwater animals from terracotta pots

Instructions No. 1937

Difficulty: Beginner

Working time: 1 hour 30 Minutes

Clay pots can be used to make wonderfully beautiful animals. We show you how you can **conjure up** our sweet underwater animals with a little colour and very Foam sheets easy. These are very decorative and give adults and children great pleasure. With a little help, even the youngest children can get beautiful handicraft results.

It is best to draw **the** individual fields and contours before painting the **clay pots**. A pencil is very well suited for this, as the lines can easily be erased or painted over. Now paint the clay pots in the desired colours

Accentuate with a little silver paint. For this, it is recommended that the brush is almost dry.

Print out the **templates** and transfer them to the **Foam sheets**. Cut out the motifs and design them or set some accents with colour.

Cut the **Cotton cord** in three parts. Make a thick knot at one end of each piece, so that it cannot slip through the small hole in the clay pots. Thread them Cord into the clay pots so that the knot is on the inside and can be used to hang Cord them up.

For the Orca: Glue it Terracotta pot with hot glue or on the Handicraft glue cut out foam rubber form. Now the whale is closed from below and has a back and side fins

For the turtle: Paint the **turtle** in your desired Wooden ball colour. This represents the head of the turtle. After drying, apply it with hot glue. Close the underside of the clay pot with the foam rubber base using craft or hot glue

For the jellyfish: Cut off pieces about 80 cm long from different tapes, take them together in the middle, bundle them and fix them with needle and thread in the middle of the foam rubber disc

Use the sponge rubber base to seal the underside of the pot with Handicraft glue or hot glue

You want to decorate your **underwater animals** outside? No problem - with a **Clear varnish** the animals are sealed and then protected from oxidation.
