VBS Creative set "Acrylic-Chickens"

Instructions No. 2102

Difficulty: Beginner

Working time: 2 Hours

Put, put, ... it's so easy to create six **chickens.** With a bag of sweets in the belly, the poultry is an excellent gift idea. Or you can hide the birds for your loved ones at Easter. After the little ones and grown-ups have eaten the delicious sweets, a great decoration for the windowsill or as a table decoration remains.

This set contains everything you need to make six funny chickens. All you need is hot glue and scissors. For that special eye-catcher you can fill a LED light chain or some straw silk into the belly.

This is how the funny chickens are designed:

Put the acrylic balls together and apply hot glue to the plastic ball's socket and stick it to the acrylic ball.
Important: Make sure that the acrylic ball can still be opened later.

Take the template and transfer it with a pencil to the coloured foam rubber plates. Cut out the motifs and glue them

to the appropriate places on the acrylic ball using hot glue.

Glue the wobbly eyes with hot glue as well. From the remaining yellow foam rubber you can cut narrow strips as worms. But our chickens have already eaten all the worms...

If you wish, you can also decorate the chickens with a waterproof marker and draw lashes, for example.

Then you can open the acrylic ball and fill it with small treats.
Attention: The acrylic ball is not food safe! If you want to fill the balls with treats, please make sure that you only use wrapped sweets.
