wind light made from wooden and acrylic blocks

Instructions No. 3383

Difficulty: Beginner

Working time: 45 Minutes

Imagine bathing your home in warm candlelight on a cozy evening and being very close to nature . With our step-by-step instructions, you can create a **unique wind light from wooden and acrylic blocks** that not only only creates a cozy atmosphere, but is also a real eye-catcher. This DIY-Idea combines natural elements such as **pressed flowers** with the modern elegance of acrylic. Let your creativity run wild and bring stylish lighting accents into your home!

Creative lanterns: a touch of nature for your home

Step **1: Paint the wooden blocks**

To start, take eight wooden blocks. Use white Chalky Paint to give the blocks a modern, matt look. Chalky Paint is a special type of paint that is known for its chalky, matte effect and adheres particularly well to wood. Apply the paint evenly to the blocks and leave to dry completely. This step gives your wind light an elegant base and makes the natural materials stand out particularly well.

Step 2: Decorate the flowers

Now comes the creative part. Choose two acrylic blocks and place pressed flowers of your choice on one of them. Pressed flowers give your wind light an individual touch and bring the beauty of nature directly into your home. Carefully place the second acrylic block on top of the first block to gently enclose the flowers. This detail makes your wind light truly unique.

Step 3: Assemble the elements

Now take one of the painted wooden blocks and apply VBS handicraft glue onto the narrow, long edge. VBS handicraft glue the glue is specially developed for craft projects and provides a strong, long-lasting bond between the materials. Make sure to glue evenly so that the later construction remains stable.

Step 4: Assembling the lantern

Now it's time to assemble. Combine the acrylic- and wooden blocks alternately to create the desired shape of your lantern. The alternation between transparent acrylic and painted wood plays with light and shadow and creates a particularly atmospheric look. Use the handicraft glue, to firmly connect the blocks together.

Step 5: Finishing and placement

Allow the glue to dry well and make sure that all connections are stable. Place your finished wind light in a clearly visible place in your home. When you place a tea light inside, the candlelight is gently refracted by the acrylic blocks and bathes the room in a pleasant play of light.

Your next creative project awaits!

Are you ready to beautify your home with a homemade wind light ? You'll find all the materials you need to get started right away in our materials list and online store. Light your creative fire and bring stylish lighting effects to any room! Visit our store now and get inspired.
